## Precision Engineering

### Job Description

**Job Title:** CNC Machinist / CNC Operator

**Responsible to:** Line Manager (Manufacturing manager / Production manager / Aerospace Production Manager)

### **Purpose of the Job:**

- To efficiently produce top quality component parts to specification.
- To perform maintenance and repair work to machinery, fixtures, plant and equipment as required by the company.
- To uphold and show by example the company's standards and values.

### **Duties and Responsibilities :**

- To work with your line manager (any of the above), to produce accurate, quality work with Zero defects to the customer.
- To continue to develop skill competencies and operate any facility required for the production of component parts.
- To ensure all work is completed within the ISO/AS9100 requirement.
- Work rotational shifts / overtime / flexible hours.
- Comply with all the company's policies, practices and rules.
- To actively participate in on-going training and development (on or off the premises).
- To be actively involved in continuous improvement activities including OEE and TPM.
- Creatively work with others to meet customer and company requirements.
- Maintain machinery and equipment to the company's standard.
- Travel to customer premises if required to meet customer need.
- Continue to progress and develop as required by the company.

No experience necessary as full training will be given.
